

Coilhullan Woods C.A.T

The “management plan report” by Victor Clements, a well known expert in these matters, concluded that the sale of these woods would be of no advantage to the community.

The so called “consultation” with the Callander community by CCDT in my view was inadequate.

FLS Callander Land Management Plan 2015-2024 supported by the community following a consultation and public meeting should be the way forward.

The CCDT in their application states that the wood has been deteriorating over many years. FLS dispute this and indeed Mr Clements Native Woodland Advice states “overall the standard of the woodlands is very good”.

No business plan has been put forward and I am concerned of financial risk to our community. We should support FLS and work in partnership to benefit our community.

Yours
