### Coilhullan Wood Asset Transfer

I would like to state my opposition to the asset transfer as I feel the wood should be in the care of professionals. I don't think volunteers would have the knowledge required when dealing with trees in a dangerous condition. The financial provision if the community owned the wood seems very weak which could incur the community in debt.

I would suggest if the community wishes to be involved with Coilhullan Wood, a joint venture with FLS would seem the correct way forward.

Yours sincerely
