LENNOX FOREST LMP
PUBLIC ACCESS AND CORE PATH MANAGEMENT

Author: u321351
Scale @ A3: 1:12,849
Date: 06/11/2019

In order to manage trees along the core path and public rights of way for tree safety considerations or to open views and improve the overall visitor experience we have applied a 10 metre buffer along these sections of the access network which covers approx. 3.2Ha., 6,148 trees with an estimated volume of ~ 1,040 m3. Some of these areas will be felled as part of the proposed felling coupe phasing but other coupes not due for felling within the life of this plan may need trees along this buffer zone removed for the reasons described. We only envisage requiring to do this intermittently when necessary and therefore wouldn't expect to impact significantly on the forest.
