Dear Ms. Carr

We are writing to express our full support for the proposed Carron Valley Community Woodland project near the Carron Dam. There is currently no provision in the area for community activities or any kind of social infrastructure. We believe the proposed project will greatly benefit our community, both from the opportunity for community involvement during the development of the facility and as a space for residents and visitors to meet and engage in community activities. We are very keen for the proposed development to proceed, and we would be happy to volunteer our time and effort to support the development.

Yours sincerely,

Adam & Esther Brooker
